# INDO-GREEK AND INDO-SCYTHIAN COINAGE

by Dr. Michael Mitchiner

This is the most important numismatic work ever published on Indo-Greek and Scythian coinage and an unprecedented amount of information has been gathered together from many sources. Ten thousand photographs illustrate the history of coinage in Afghanistan and Pakistan during the five centuries that elapsed from the coming of Greek culture with Alexander the Great in 330 B.C. until the foundation of the Sassanian Empire by Ardeshir in A.D. 226.

Many coins are illustrated for the first time and numerous hitherto unrecorded issues are presented; a full description of each issue being placed alongside the relevant photographs. The wealth of new material has enabled Dr. Mitchiner to draw many new conclusions about the history of this region. These are contained in an easily read text that is amplified by numerous maps and tables. This presentation of a particularly interesting period in Greek and Indian history should be of considerable interest to collectors, historians and archaeologists alike.

## ORIENTAL COINS AND THEIR VALUES

Vol. I. THE WORLD OF ISLAM by Michael Mitchiner

**£25.00**

Islam embraced a substantial portion of the world for many centuries. Following expansion during the 7th and 8th centuries A.D., the Caliphate extended from southern France and Spain in the west, along northern Africa to Egypt and Arabia. From the seat of the Caliphate at Damascus the domain of Islam extended thence across Syria, Mesopotamia, Eastern Turkey and the Caucasus; and beyond these provinces eastwards across Iran and Afghanistan to the most distant provinces of Transoxiana and Sind.

The book lists and illustrates more than 4000 coins struck by over 350 different dynasties and kingdoms from the seventh to the twentieth century A.D., with salient features of the identifications rendered in English and Arabic, and interspersed with abundant historical introductions to the many dynasties and lists of rulers.

In addition, there are also tables of Islamic mints, eras, inscriptions and coin metrology.

Its scope ranges from the Atlantic ocean in the west to the China seas in the east; from the steppes of Central Asia in the North to Ceylon and Indonesia in the south.

In addition to the above, there are three appendices dealing with coin weights, source of coins catalogued, and values.

The format is the same as volume I but with stout library-style binding.

# Young Collector Series

Having long been aware that coins have become increasingly expensive thus making it difficult for the young collector to begin collecting coins and banknotes, we are pleased to offer the following Young Collector Series.

The coins are all 20th century bright uncirculated coins of the world of low denominations in base metals. The banknotes are for the most part crisp uncirculated although some are used. Some are legal tender but most are not.

We believe that these items will prove attractive to the novice collector of coins and notes and will fill a need which has long been catered for in the philatelic world.

### **Mitchiner, Dr. M. Indo-Greek and Indo-Scythian Coinage. 9 volumes**

This is the most important numismatic work ever published on Indo-Greek and Scythian coinage and an unprecedented amount of information has been gathered together from many sources. Ten thousand photographs illustrate the history of coinage in Afghanistan and Pakistan during the five centuries that elapsed from the coming of Greek culture with Alexander the Great in 330 B.C. until the foundation of the Sassanian Empire by Ardeshir in A.D. 226.

Many coins are illustrated for the first time and numerous hitherto unrecorded issues are presented; a full description of each issue being placed alongside the relevant photographs. The wealth of new material has enabled Dr. Mitchiner to draw many new conclusions about the history of this region. These are contained in an easily read text that is amplified by numerous maps and tables. This presentation of a particularly interesting period in Greek and Indian history should be of considerable interest to collectors, historians and archaeologists alike.

B. A. Seaby Ltd. has for many years been recognised as one of the world's leading publishers of numismatic books. We are now proud to report that its sister company, Seaby (Rare Books) Ltd. is also rapidly reasserting Seaby's position as one of the small number of firms specialising in the whole range of old and out of print literature on numismatics and related subjects.

At Seaby Rare Books we take the view that numismatic books provide incomparably for a very wide range of interests. They are essential tools for the serious numismatic student as well as for the coin collector. In addition they include superb examples of book printing and illustration which are sought by the most dedicated bibliophiles. Numismatic books are, of course, almost as old as printing itself and there are thus early editions of such books from the great European printing houses. Some old numismatic books (and some not so old) are of great rarity and many others are both curious and obscure. It is certain that one does not have to be simply a coin collector fully to appreciate them.

Above all, though, old and fine numismatic books are, to reverse John Evelyn's much-quoted phrase, an essential adjunct to a coin cabinet. The two hang inextricably together.

At Audley House we take pride in our very wide range of books in stock and we always welcome enquiries, however small, from collectors, librarians and coin dealers.

Lists of desiderata are attended to with care and accordingly we find that our books are increasingly being sold by direct quotation to customers in response to their wants lists.

We are naturally always keen to buy books, either significant single works or collections, and gladly travel to view when appropriate. We view lots and execute commissions for customers wishing to purchase numismatic books at the principal auctions. We also undertake valuations for probate, insurance and family division.

Visitors to Audley House are most welcome, either to view our stock or simply to discuss their collecting interests. Clare Long is always available without appointment during the usual office hours. I am here less often, and we suggest that a prior appointment is therefore advisable.

## ROMAN AND BYZANTINE

## Corpus Nummorum Romanorum

**A. Banti and L. Simonetti.** *A general catalogue illustrating the Roman Imperial series.*

*A valuable feature of this partly bilingual work for both student and collector is the wealth of photographic illustrations contained in its text, these being drawn from dealer's lists and sale catalogues, as well as from museum collections for some of the more important pieces. The text is in Italian, with historical notes in English.*

*The arrangement adopted by the authors make this work quick and easy to use for even the quite inexperienced collector. There is also a list of valuations at the end of each volume compiled from auctions and dealer's lists from the past twenty years.*
